

## **RMS - Regrow gets GMP, GLP and GCP certification**

**Our News Bureau - Mumbai**

Regenerative Medical Services received the three major certifications, Good Manufacturing Practices (GMP), Good Laboratory Practices (GLP) and Good Clinical Practices (GCP) from the International Accredited Body — BSI (British Standard Institution).

The GMP, GLP and GCP certifications received by RMS-Regrow are recognition from an approved international body which validate the procedures adopted and followed at RMS-Regrow. These certifications place RMS Regrow in the select league of companies that have been awarded such a global honor. It is a matter of national pride for the company not only to

be involved in the commercial delivery of cellular therapies and stem cell banking, but also to be internationally recognised for the same.

"This is a landmark achievement for us as this certification has come within the first two years of the company's operations since September 2009 after receiving its ISO 13485:2003. This significant milestone enables the company to advance the global commercialisation of cellular therapies, live up to the commitment of exceeding customer expectations and maintaining manufacturing excellence" said Dr Satyen Sanghavi, chief scientific officer at RMS.
