## RMS's Babycell to enhance blood banking business in Andhra Pradesh

SME News, Saturday, May 8, 2010 12:27:41 PM IST

cord blood and tissue banking.

Mostly, it has been seen that Parents don't plan any health concerns at the time of child's birth, so it is important to make expecting parents aware about the decision of bank child's umbilical cord blood stem cells is vital as the opportunity to do so is only at the time of birth. Scientists and clinicians are agreed about the fact that the stem cells found in cord blood are one of the most promising sources for cellular therapy.

The Consultant Gynaecologist and Medical Geneticist, at Vasavi Medical & Research Centre, Dr Vijayalakshmi said, "The use of umbilical cord blood stem cells has increased significantly in the past 20 years. Today, doctors all over the world are realizing the power of newborn stem cells and recommending family banking to their patients. When faced with the illness of a child or loved one, families want hope and doctors want options. Banking newborn stem cells provides both."

HYDERABAD: The CSO of Babycell, Dr Satyen Sanghavi has announced the company's expansion intensions pertaining to the cord blood and tissue banking services in Hyderabad. The firm wants to change the thinking of the parents living in the state towards having access to
